**SUMMARY**

**~~"HANGING ELEMENT"~~**

~~This includes an extended body equipped with a lower insertion body and an upper closure head forming a matrix of many hanging elements joined to each other via the side projections. Each insertion body is extended into a wire which ends as a Y joint where the respective single wires split to form a closed loop which joined together in the closure head and into which the hook or similar product may be hung to hang of a piece of meat or other object (fish etc) which remains suspended from the insertion body. The closure head may have on its upper end a ringbolt or attachment and includes an identification tag through the joint.~~

~~It allows automated insertion using an appropriate tool and at the same time guarantees maximum hygiene because it is disposable.~~

Please delete the paragraph on page 2, lines 2-7, as follows

~~As stated in the title page, this Invention Patent application consists of a "HANGING ELEMENT", having new construction, format and design features complying with the purpose for which it has been specifically designed with maximum safety and efficiency and offering numerous advantages as shall be detailed in this report.~~
